PROFILE

SUMMARY

Curious and motivated IT undergraduate with hands-on experience in Python, data preprocessing, and machine learning model development. Familiar with working on datasets, training and evaluating models using Scikit-learn, and eager to apply AI solutions to real-world business problems in a fast-paced environment.

SKILLS

- Programming: Python, Java, C++
- Machine Learning: Supervised Learning, Regression, Model Training & Evaluation
- Data: Data Cleaning, Preprocessing, Feature Engineering
- Web: HTML, CSS, JavaScript, Bootstrap
- Core CS: OOP, Debugging, Unit Testing
- Soft Skills: Problem-solving, Communication

PROJECTS

Resume Score And Job Recommendation System 🔗

Tech Stack :Python, Streamlit, Google Gemini API, Pandas, PyPDF2.

- Developed an intelligent Applicant Tracking System (ATS) simulator using Python and Streamlit to evaluate candidate resumes against job descriptions in real-time.
- Integrated Google Gemini 2.5 Flash (LLM) to perform semantic analysis, generating a match percentage score and identifying critical keyword gaps (missing hard/soft skills).
- Engineered a recommendation system that suggests relevant job titles and provides direct search links (LinkedIn/Google) based on the user's profile analysis.
- Designed a responsive, dark-mode UI with interactive data visualization (Pandas charts) to display skill gaps and improvement suggestions.
- Implemented PDF parsing automation using PyPDF2 to extract and structure unstructured resume data for AI processing.

House Price Prediction 🔗

House Price Prediction | Machine Learning Project

Tech Stack: Python, NumPy, Pandas, Scikit-learn, Flask

- Developed a Machine Learning model using Python and Scikit-learn to predict house prices
- Performed data preprocessing including missing value handling and one-hot encoding
- Trained and evaluated regression models using appropriate performance metrics
- Integrated the trained model into a Flask backend for real-time predictions
- Performed debugging and basic unit testing to improve model reliability

Weather Website 🔗

Weather Monitoring Web Application

Tech Stack: HTML, CSS, JavaScript, OpenWeatherMap API

- Built a responsive web application to display real-time weather data
- Integrated external API and processed JSON responses
- Improved user experience with responsive UI design

EDUCATION

Bachelor of Engineering in Information Technology

Savitribai Phule Pune University (SPPU)

2023 – 2027

Pune

ACHIEVEMENTS

Finalist – Indradhanu: International Grand Challenge (AI for Climate Change)

Built an AI model for detecting illegal deforestation using satellite imagery; shortlisted among **Top 30 teams** out of **1000+**.

Ranked in the top 10% in MHT-CET

Received full tuition fee waiver (TFW) based on merit.

Certified for completing an AI Workshop at IIT Bombay

focused on AI fundamentals and hands-on learning.

CERTIFICATES

Supervised Machine Learning: Regression and Classification 🔗

DeepLearning.AI – 2025

Database Management Systems

Scaler – 2024
